

SOVEREIGN

Enterprise Production Distribution - Final Engineering Report

PACKAGE_READY

A. Final Status

The current accepted SOVEREIGN application was packaged from the live working tree, verified from a disposable copy, smoke-tested after ZIP extraction, and promoted without changing the tested archive bytes.

B. Source Snapshot

Source root	D:\Sov 1\SOVEREIGN_PRODUCT_COMPLETION_WORK
Git HEAD	0ed70dd79f094953ab20010d9400450e9795b91e
Branch	master
Working tree	Dirty by design: 48 modified files and 1 untracked file
Tracked diff fingerprint	e1133097689e741d127b92859b6e4a9d3ab60a96
Snapshot timestamp	2026-08-13T14:25:20.503-05:00
Changed by packaging	NO

C. Final Artifact

ZIP	D:\Sov 1\RELEASES\SOVEREIGN_ENTERPRISE_PRODUCTION_20260813_142520.zip
Size	453,948 bytes (443.31 KiB)
Archive file count	126
Uncompressed size	1,752,062 bytes
Top-level root	SOVEREIGN\

D. Checksum

Algorithm	SHA-256
SHA-256	150e518e6d0b15b524ff61cda8fe8eb29aec6bbfb30196f9931908d12ff7ec51
Checksum file	D:\Sov 1\RELEASES\SOVEREIGN_ENTERPRISE_PRODUCTION_20260813_142520.zip.sha256

E. Package Content

Included: sovereign_product; production lifecycle scripts; current Python engine and supporting packages; SYSTEM_MANIFEST.json; runtime_profile.json; requirements.txt; runtime configuration; schemas; constitution; synthesis; broker and library assets; prebuilt UI under ui/ui_shell/dist; legacy adapter handoff; README_PRODUCTION.md; and PACKAGE_MANIFEST.txt.

F. Package Exclusions

Git metadata (.git)	EXCLUDED
Node modules	EXCLUDED
Python virtual environments	EXCLUDED
Operator runtime data and conversation history	EXCLUDED
Logs and current jobs	EXCLUDED
Proof and benchmark evidence/harnesses	EXCLUDED
Model weights and model caches	EXCLUDED
Known secrets and credentials	EXCLUDED
Development tests and caches	EXCLUDED

G. Current Product Configuration

Product version	3.1.2
Primary reasoner	qwen3:14b
Adversarial challenger	qwen3:32b
Critic	qwen3:8b
Synthesizer	qwen2.5:14b-instruct
Embedding model	nomic-embed-text:latest
Global context maximum	131072
Generation maximum	32768

H. External Dependencies

Compatible Windows host with PowerShell; Python 3.10 or newer; a root-local .venv; Flask 3.1.3; requests 2.34.2; ChromaDB 1.5.9; NumPy 2.5.1; Pydantic 2.13.4; local Ollama at <http://127.0.0.1:11434>; all five assigned model tags installed; and loopback port 5175 by default. Node.js is build-time only because the production UI is prebuilt.

I. Build and Source Verification

Python compilation and import checks	PASS
Fresh frontend production build	PASS
Built assets matched live current dist byte-for-byte	PASS
Bounded Python tests - 131 passed	PASS
Bounded UI tests - 26 passed	PASS
Source-state comparison	UNCHANGED

J. Extracted Package Smoke Test

Candidate ZIP extraction	PASS
Dependency preparation from packaged requirements	PASS
Startup through Start-Sovereign.ps1	PASS
Health endpoint and version 3.1.2	PASS
Operator UI load and required controls	PASS
Models inventory and five assignments	PASS
Settings and status endpoints	PASS
STATUS, QUICK, CONTINUITY, DEEP, RESEARCH routes	PASS
Bounded QUICK request returned exactly OK	PASS
Diagnostics and listener containment	PASS
Normal shutdown	PASS

K. Original Service Restoration

Running before task	NO
Temporarily stopped	NO
Restored	NOT APPLICABLE
Final original health	NOT APPLICABLE
Ports after testing	5175 and 5275 clear

L. Source Preservation

No existing SOVEREIGN application source, configuration semantics, or accepted working-tree behavior was intentionally changed as part of this packaging operation.

M. Model Distribution Statement

Model weights are not included	CONFIRMED
Current model-role assignments are preserved as defaults	CONFIRMED
Documentation describes defaults as replaceable, not permanent architecture	CONFIRMED

N. Final Package Verification

Final ZIP opens	PASS
Exactly one SOVEREIGN top-level root	PASS
Required production files present	PASS
SHA-256 sidecar verified	PASS
Smoke-tested candidate bytes promoted unchanged	PASS
Authoritative source fingerprints unchanged	PASS

Operational note: clean staging and disposable verification directories were retained because recursive cleanup was blocked by execution policy. They are outside the final ZIP and do not affect the release artifact.

Operator	Sam Flynn
Project	SOVEREIGN
Report status	PACKAGE_READY
